

Title (30 seconds\*)

Name

(include appropriate background picture  
related to your chosen energy)

\* Recommended times

# Up to 3 slides (3 minutes)

- Bullet points—no paragraphs. You may put notes in the margins
- How your energy is made into electricity and/or used to do work?
- What is the relative cost of the energy compared to other types of energy? (is it cheap or expensive?)
- Is your energy renewable?
- Positives and Negatives (pros and cons) of your energy
- What is the most common use of your energy?

# Summary & Resources (30 seconds\*)

- Quick rehash of main points
- References: Websites, books, magazine articles, interviews
- Wikipedia is not a primary (or verified) source

# **Sources of Energy**

- Oil (Petroleum)
- Natural Gas
- Coal
- Nuclear Fission
- Nuclear Fusion
- Biofuels
- Hydropower
  - Dams
  - Waves
  - Tides
- Garbage to Gas
- Wood
- Hydrogen
- Blue Hydrogen
- Gasoline
- Solar
  - Heat
  - Electricity
- Geothermal
- Osmosis
- Human
- Wind
