

46 PHONOGRAMS MASTERED IN KINDERGARTEN

Students say all the sounds of each phonogram without wording and rules (* rules and wording assessed separately). Wait three seconds for a response, then give them the sounds, circle the phonogram as an error and continue assessing.

These are the 46 phonograms to be mastered for accuracy by end of year. If a student is accurate let them continue to practice for automaticity. Automaticity would mean reading them in 1 minute.
